## Grasshopper Straight Roof Tension Rafter

An ideal addition for the Grasshopper Straight Roof Rafter for the caravan roll out awning; After installation mount the rafter in the middle of the roll out awning, and push out the curved roller of the roll out awning to be straight once more. By completing this procedure the NEW power Tension Roof Rafter provides

Features are:

- ✓ Allows the rafter to place tension on the Roof Vinyl which will assist in the elimination of flapping during windy conditions
- ✓ Assists with the prevention of water collection on the roof canopy
- ✓ Eliminates the vinyl sagging and reduces the possibility of vinyl damage by hanging over the rafter bar and rubbing during windy weather
