

ENJOY PEACE AT EVERY CAMP

Say goodbye to annoying, damaging wind flaps and enjoy any camp in peace thanks to these Grasshopper Anti-Flap Kits

Grasshopper have created a solution to two major problems faced by awning owners all over Australia: annoying awning flap caused by wind and sun or rain entering from the side walls, causing damage, which could run our repair bills up into the hundreds. This innovative Anti-Flap Kit is designed to stop all of this. It's perfect for both roll out and box awnings and has been created from the most durable and high quality products on the market, to ensure it's suited to helping you for years to come.

FORWARD-THINKING INNOVATION

The Anti-Flap Kit is incredibly compact and easily stored, thanks to the innovative design, which allows RVers to break it down into four individual sections. When joined together, they form a full-length Straight Roof Rafter (SRR), which is used with specifically designed

clamps to hold the canopy fabric and prevent wind flap. The SRR also has two sail tracks designed into its profile, which perfectly enables it to hold two side walls, giving you more flexibility in wall choice at all times.

GOING THE EXTRA MILE

The Anti-Flap Kits fit all awnings up to a 2.5m projection, but where custom design is needed, SunBuster are only too happy to help out. They also have a huge range of complimentary products, such as the BBQ Awning Roof Extender, which is the perfect solution to vanners wanting to cook in the great outdoors whilst using their Anti-Flap Kit. The Roof section can be made to the clients requirements, with either Heat Proof Vinyl or Sunblocker material available, which proves just how dedicated they are to making the perfect product for every RVer. ■

WHY THE GRASSHOPPER ANTI-FLAP KIT IS PERFECT FOR RVERS

- ✓ Made from durable materials
- ✓ Offers an obstacle free roof extension
- ✓ Custom make services available
- ✓ Compact design allows for easy storage
